

Foaming Brush

Bubble Blast is a premium, extremely high foaming chemical that gives rich shaving cream foam, is an exceptional lubricant for friction washes and foam brushes, and is an excellent cleaner with special detergents designed to increase customer appeal at your wash. Each color has its own rich fragrance making it a hit at your wash. Bubble Blast can be used in self-serve foam brushes or guns, in touchless automatic foam arches, or as a lubricating detergent in friction washes. Bubble Blast also contains the unique S² Technology so that your customers get a cleaner car.

For a Powerful Lemon Fragrance, Use:

BUBBLE BLAST White
Foaming Detergent

For a Sweet Grape Fragrance, Use:

BUBBLE BLAST BLUE
Foaming Detergent

For a Fun Tropical Fragrance, Use:

BUBBLE BLAST GOLD
Foaming Detergent

For a Rich Cherry Fragrance, Use:

BUBBLE BLAST RED
Foaming Detergent

Spray Waxes

CHERRY GLAZE
Spray Wax and Rinse Aid WITH CARNAUBA

LEMON GLAZE
Spray Wax and Rinse Aid WITH CARNAUBA

Cherry Glaze and Lemon Glaze are concentrated with synthetic and carnauba wax for quick drying of vehicles in self-serve, automatic, or tunnel wash systems. They are very rich in fragrance and give a great visual wax effect for customer appeal. Their multi-functional rinsing effect will give small water droplets when rinsed at low pressure and will sheet water off the vehicle when rinsed with high pressure. Renegade's Glazes are exceptional with their unique blend of synthetically modified wax and emulsified carnauba, leaving a crisp shine on your customer's vehicles.

Triple Colored Waxes

Foam Glaze Red, Gold, and Blue are three of the best performing triple colored waxes on the market today. Many competitor foam waxes simply add wax to a foam brush detergent, neutralizing the ability for the wax to perform. The result? The wax cannot attach to the vehicle, poor rinsing in automatics leaves spots, and angry customers never saw the wax they thought they paid for. Foam Glaze will give rich shaving-cream foam, brilliant color, a strong cherry fragrance that permeates the interior of the car, better rinsing in your automatic, and a great wax effect on windshields and car bodies. If you run Triple Colored foam arches in your automatics or Triple Colored foam guns in your self-service bays, Foam Glaze is a must have for your carwash.

Tire, Wheel, and Engine Cleaners

DRAGONFLY
GREEN FOAMING TIRE CLEANER

YELLOW JACKET
COLORED TIRE AND WHEEL CLEANER

Dragonfly and Yellow Jacket are the best for both tire and wheel cleaning on the market today. Dragonfly and Yellow Jacket are identical products, but you have the choice of choosing Dragonfly for green foam and Yellow Jacket for gold foam in your car wash bays. These products are a must-have for every car wash. Wheel cleaners do not get the tires clean and tire cleaners damage wheels and paint. Dragonfly and Yellow Jacket are uniquely built to clean both! These two products will whiten whitewalls, clean engines, and remove dirt from tires quickly and easily while special detergents will remove brake dust from wheels with NO SCRUBBING required! Simply apply either product to wheel and rinse with high pressure. It will even remove brake dust from wire wheel and honeycomb wheels. With new S² Technology, these products not only outperform other products, they also improve your bottom line. Dragonfly and Yellow Jacket are safe on all wheels and are biodegradable.
