Bug and Wash Pre-Treatment

Clean Soak is a 90:1 presoak with proprietary S² Technology that actually works at removing road film AND bugs! This concentrated formula not only gives you more free time to manage your business, it also washes more cars per gallon increasing your total revenue. Clean Soak can double as a presoak and high pressure wash in automatics and self-service washes, saving equipment room space and simplifying your purchasing process. Clean Soak Purple is the same great product as Clean Soak, but with purple colored foam for great show in your wash.

Powder Soak is a heavy-duty vehicle presoak designed to easily remove road film, dirt, and window masking. With new S² Technology, Powder Soak not only outperforms other products, it also improves your bottom line. This concentrated powder is safe on vehicle surfaces and can be diluted up to 2000:1 (wt/wt) as a high pressure wash. Powder Soak is biodegradable and non-hazardous.

Clean Soak-A is a low pH presoak that is excellent at removing red clay, road salts, and water spotting from every surface of the car. Clean Soak A does not contain hydrofluoric acid, will not etch glass, and can be used on chrome and aluminum wheels.

Hydro-Soak is the acid presoak of the future. It is formulated similar to our popular Quick Brite Citrus, making it an exceptional acid presoak capable of performing like a traditional hydrofluoric acid presoak...but, without being poisonous! This high-foaming product is a "must-have" for any car or truck wash who wants to improve the safety of their employees and customers without sacrificing performance. This product WILL cut brake dust and WILL remove road film just like a traditional hydrofluoric presoak WITHOUT the negative hazards associated with them. Hydro-Soak is biodegradable and, when pH neutralized, is safe for disposal in most municipalities.

Ultra Soak is a technology breakthrough in car wash technology...a 200:1 presoak that really works! Lasting nearly three times longer than most presoaks, Ultra Soak extends the time between maintenance visits, reduces delivery costs, and reduces your chemical costs per wash. This is not a kit. There is no special mixing. Simply drop your chemical feed hose in your Ultra Soak container and meter 200:1 for low pressure presoaking. This product is also great as a high pressure wash detergent at 500:1, making Ultra Soak your perfect do-all vehicle detergent.

Squadron is a a premium high pressure detergent designed to remove dirt and road film from car, van, truck, box truck, and semi fleets. It is safe on paint, glass, and even polished aluminum (when used properly). It gives great foam with a pleasant tropical fruit fragrance in the wash bay. With new S² Technology, this product not only outperforms other fleet wash detergents, it also improves your bottom line. Squadron is non-acid and biodegradable.

All Prep is a revolutionary bug and wash pre-treatment that will not damage glass, plastic, painted surfaces, or polished wheels even if it dries! All Prep pays for itself by removing the risk from pre-treating your customer's vehicles or trucks. It will loosen bugs, penetrate dirt, and boost your wash process to better remove road film and window masking. In addition, with new S² Technology, this product not only outperforms other bug removers, it also improves your bottom line. All Prep is non-acid and biodegradable.
