QUICK WASH FLEET WASH DETERGENT

Presoak...Wash...and Shine!

Quick Wash is your do-all touch-free detergent. It can be used as a presoak or wash on tractors and trailers, fleet vehicles such as cars and pick-up trucks, box trucks, tow trucks, trash trucks, or heavy equipment. It also contains a special no-buff polish that adheres to the entire vehicle and is not removed by the rinsing step. When dry, it leaves a bright gloss all over the vehicle and makes the vehicle easier to clean the next time you wash. We call it "Easy Shine".

When Time is Money...

When time is money, Quick Wash should be your first choice. It is exceptional at removing road film and bugs without using harsh chemicals. It is the perfect touchless wash presoak as it tackles the tough road film found on windshields while it removes bugs from grilles. It will remove soot from diesel stacks and work especially well at removing the carbon build-up on trailers that forms behind the stacks...WITHOUT SCRUBBING! Since Quick Wash is safe on aluminum, it can be used to clean both tractors and trailers saving you valuable time. It is the ideal fleet wash detergent - it will clean and shine the vehicle in one step, reduces water spotting, and reduces the time it takes you to clean your fleets!

Safe for the Environment...Safe for You!

Quick Wash uses new branched-tail surfactant technology which makes it an exceptional cleaner and highly biodegradable. It contains no phenols, no butyls, is non-phosphate, and is non-corrosive.

Protectant Wash

Vehicle Hand Wash and Protectant

Protectant Wash is a one-step cleaner and protectant designed for those who hand wash their vehicles. It contains special cleaners that remove dirt, oil, bugs, bird droppings, water spots, and road film from the vehicle surface safely without the risk of damage to fine-finish aftermarket accessories, glass, chrome, plastic, convertible tops, polished aluminum, or most any other surface found on vehicles. It does not contain silicones and is the paint shop's alternative for wash-and-wax.

Protectant Wash uses a very soft, water-based, synthetically modified sealer that layers smoothly and evenly leaving a great shine on the vehicle. Special rinse additives makes most of the rinse water fall off the vehicle quickly making drying of the vehicle quicker and easier. This high foaming detergent has a great cherry fragrance and is biodegradable.

Cleans and Shines without Wax or Silicones!

BLACK SATIN FAST DRYING SOLVENT TIRE DRESSING

Black Satin is a solvent based dressing that dries quickly and evenly on tires and exterior trim. It penetrates deep within the tire leaving a like-new tire gloss. Its high molecular weight silicones provide long-lasting protection against weather, leaving your tires looking better for longer. It can be used on rubber, vinyl, and plastic surfaces making it the choice dressing for quick detailing.

INTERIOR DRESSING SATIN FINISH CONDITIONS LEATHER!

Interior Dressing is a non-greasy protectant that gives a clean, satin finish on interiors and trim. This water-based formula is specially designed to help reduce the electrostatic attraction of surfaces to dust, which keeps interiors cleaner for longer. It will return interior or exterior trim back to its new, black finish simply by wiping or leave a deep gloss on tires. In addition, special conditioners help soften and protect leather, making Interior Dressing the detailer's number-one choice for a do-all dressing.

DRAGONFLY™ GREEN FOAMING TIRE & WHEEL CLEANER

Dragonfly is the best for both tire and wheel cleaning. It whitens whitewalls, cleans engines, softens bugs, and removes dirt from tires quickly and easily. This must-have product also removes brake dust from wheels with NO SCRUBBING required! Simply apply Yellow Jacket to the wheel and rinse with high pressure. It will even remove brake dust from difficult wire wheel and honeycomb wheels without touching the wheel. It not only outperforms other products, it saves time and improves your bottom line. Dragonfly is non-acid and is safe on all wheels.

GLASS CLEANER

Renegade's Glass Cleaner is a non-ammonia glass cleaner blended with special detergents to quickly clean glass and hard surfaces to a streak-free shine. It dries quickly and will not damage window tinting or vinyl surfaces, making it the ideal detail cleaner. It does not contain toxic methanol and is much safer to use than most windshield washer fluids. It is concentrated for professional use or can be diluted with water for light duty maintenance cleaning.

SAFE ON WINDOW TINTING!
