

WHY Choose Renegade?

Because it's Your Business.

Whether you need technical assistance from a chemist or a custom formulated product to distinguish you from your competitors, Renegade Chemicals is here to help. Our in-house chemist can help you develop the ideal product for your operational needs. When your business depends on chemicals, you can rest easy that help is just a phone call away.

WHAT Makes us Special?

We make business with us easy.

Like our name says, we are here to change the industry. The customer should not have to conform to the industry's demands; rather, the industry needs to conform with the customer's demands. And, the customer is wanting more from their products. Unlike many "static" products on the market, our products are dynamic with the changes in technology. This assures that you receive the most efficient product available. **That** is why we are Renegade.

Special Packaging not a problem!

Whether your packaging requirements are 8 oz. bottles or tanker trucks, we are your premier manufacturing source!

Our in-house Lab and on-staff Chemist can help you develop the ideal product for your operational needs!

Who would you rather discuss your chemical solution with:

a Chemist
OR
Salesman?

Renegade Chemicals is the vision of chemist Michael Tyndall who believes the customer is ready for a change. There is a need in this industry for a technology focused company, not a marketing driven company. When you call looking for a solution to your problem, you get a chemist...not a salesman.

The following are real issues solved by Michael:

Problem: You are the maintenance supervisor for a transmission rebuild company. Your sediment testing is out of specification and you are about ready to shut down the plant until the problem is resolved.

Problem: You have been informed by the city that your company's wastewater is too high in fluorine because of the aluminum brightener used in your truck wash. If the problem is not resolved, you will have to close your business.

Problem: Your existing product is out of compliance with the new CARB regulations in California. You need the expertise to reformulate.

Your Solution...?

Renegade
